The White LIED! THE AGE OF GENOCIDE 79 BC TO 2026 AD

HIDING THE DEADLY GENE MUTATION A111T "KING SICKNESS"

ABANUOKWU MATTHEW OKOH

THE White LIED! THE AGE OF CANNIBALISTIC GENOCIDE 79 BC TO 2026 AD

HIDING THE DEADLY GENE MUTATION A111T "King Sickness"

THE PHYSICAL PROOF THAT STILL STANDS

18 obelisks in Europe with Egyptian writing but their original bases have been later covered (12 in Rome including the Vatican, 2 in Florence, 1 in Urbino, 1 in Arles, 1 in Istanbul).

📜 **Sulla's Proscriptions kill list I and Second Proscriptions Kill List II**(43 BC) with reward of keeping property of person you kill | 📜 **Pact of Misenum,** Triumvirs terms of surrender to Sextus Pompeius Magnus Pius (39 BC)

Start Your Decolonization
Connecting The Dots of What We Proved:

Ötzi was found in Alps 5000+ years old was Black, had **no A111T "King Sickness"** mutation. The Celtic clans were cannibals. The Yamnaya / Bell Beaker Celtic & Gaul Clan culture coming from the eastern and western Alpine region replaced the Central Europe population exactly when the mutation reached fixation. Sulla's kill list targeted Africans. They vanished. The killers wrote history. Same families still rule. That's not conspiracy. That's evidence.

If the mutation came from the Middle East as mainstream say, why is it **99% in Europe** with A111T "King Sickness" mutation and why did the Yamnaya / Bell Celtic & Gaul Clan coming from Alpine region replace of Central Europe exactly when A111T "King Sickness" reached fixation in Europe?

We found that the extreme **Y-chromosome replacement** seen **across Europe** suggests a **patriarchal social structure** where elite males from the incoming population held a reproductive advantage over local men—akin to the privileges historically associated with feudal lordship, such as **jus primae noctis (the lord's right to the first night).**

The explanation of how this works: The A111T "King Sickness" mutation sits on the entrance way (the SLC24A5 gene's ion-binding domain) which handles communication (calcium/potassium/sodium ion exchange and cellular signaling) to the other houses (organs) on the street/neighborhood.

The A111T "King Sickness" doesn't just create lighter skin color — it disrupts the whole neighborhood due to the fact of its location. The street (the cellular ion transport and metabolic network) includes ion transporters (SLC24A family), hormone-producing organs like the ovaries, cholesterol metabolism, and bone mineralization pathways.

The mutation disrupts one house after another, affecting the whole street/neighborhood — which is why we see 47+ diseases, hormone decline in aging women, and bone disorders all connected to this single address.

By connecting the dots using the **archaeological evidence,** we found that **cannibalism** was practiced in the Alps for over 10,000 years. The A111T "King Sickness" mutation, seen as lighter skin color, became **fixed in European populations (~99%)** around 5,000 years ago. The A111T "King Sickness" mutation in the SLC24A5 gene, which causes lighter skin and is fixed in ~99% of Europeans, increases the risk of melanoma by over 7-fold (600%). As a result, melanoma alone kills ~25,000 people in Europe each year. When squamous cell carcinoma (SCC) is included, the total rises to approximately 44,000 deaths annually from UV-induced skin cancers — a number that is routinely underreported because SCC deaths are hidden under the category of Nonmelanoma Skin Cancer (NMSC). In addition, Europe registered over 27 million NMSC cases between 1992 and 2021, with SCC accounting for the vast majority of deaths. By contrast, dark/black skin does not show the same elevated

risk; the dark skin provides a 13% to 15% UV protection, providing natural protection against UV damage. This is just one of many diseases that are caused by the A111T “King Sickness” mutation.

We found 18 obelisks still standing in Europe dating back over 5,000 years, outdating all European history. We found 7,000+ African Nuraghi towers in Sardinia with tools still lying at the site, also outdating all European history. **Pompeii DNA (2024) proves dark-skinned populations** were preserved over time by the volcanic eruption, showing no Greek or Celtic clans. We found the fabrication of history and religion, in addition to the fact of the Celtic Clan Sulla issuing a kill list called **Sulla's Proscriptions two times to kill dark-skinned people and take their property**. After this Sulla's Celtic Clan killing order, we found that all new construction of obelisks and towers stopped. We found that Sulla's purge systematically eliminated the African (black-skinned) population by the Celtic cannibalistic chiefdom clans from the Alps.

The 13 Celtic Clan families that we found to be the cause of and participants in Sulla's purge are depicted in Leonardo da Vinci's The Last Supper painting — Valerii, Manlii, Fabii, Cornelii, Claudii, Julii, Aemilii, Senones, Boii, Insubres, Lingones, Cenomani, Carni, Gesati, and Taurini.

We found that the A111T “King Sickness” mutation is the same gene that caused additional sicknesses that could be prevented and cured when the initial mutation of A111T “King Sickness” is treated, saving millions of lives.

Genocide of the Obelisk History: The new Obelisk bases were made to hide and replace the original bases. They were deliberately crafted as public proclamations that these ancient symbols of paganism had been conquered and transformed into powerful emblems of the Christian faith and papal power. **Pope Sixtus V**, in 1586 AD as part of his grand plan to re-Christianize the city’s landscape, ordered the engineer Domenico Fontana to re-create the obelisk base turning them into key Christian pilgrimage sites. We are not making this up. The evidence is there for anyone who wants to see it. The only thing that has been missing is the courage to see it without gaslighting for what it is.

We are not making this up. The evidence is there for anyone who wants to see it. The only thing that has been missing is the courage to see it without gaslighting for what it is.

📜 Religion Was Fabricated

By connecting the dots we find out who is in the painting of Leonardo da Vinci's The Last Supper. They are the families that are remaining after Sulla's Celtic Clan purge list of 84 BC. We found them to be Valerii, Manlii, Fabii, Cornelii, Claudii, Julii, Aemilii, Senones, Boii, Insubres, Lingones, Cenomani, Carni, Gesati, and Taurini. They are the ones behind Sulla's purge list and the cannibalistic genocide that followed for over 2026 years and have been hiding the A111T “King Sickness” gene mutation that is found in 99% of all Europeans, causing over 40 diseases initiating from A111T “King Sickness” that could have been prevented and saving millions of lives.

📜 History Was Fabricated

Thucydides 1.22 — admitted he invented speeches based on what he thought was appropriate.
Livy's Preface — admitted early Roman history is "adorned with poetic legends" not "trustworthy historical proofs."
No evidence for Alexander — all accounts written centuries later by "late derivative writers."
No evidence for Jesus — no historical archeology evidence or records.
No original manuscripts exist — all copies are 500–1,800 years after the fictional historians lived.

🧬 Pompeii DNA (2024)

Population was of Eastern Mediterranean and North African ancestry — dark-skinned people.

A diverse place — people from "different eastern Mediterranean or North African populations."
The "mother" with the golden bracelet — was actually male, had black hair and dark skin.
No evidence of Jewish or Christian religion — each house had its own house goddess/god.
The volcano preserved the truth — a time stamp proving the official Roman narrative is a lie.

🏛️ 18 Obelisks in Europe

There are 18 obelisks with Egyptian writing still standing in Europe today. All were made in Egypt and transported to Europe by the Egyptians. They include 12 in Rome including the Vatican, 2 in Florence, 1 in Urbino, 1 in Arles, and 1 in Istanbul. These obelisks were brought to Europe over 4,000 years ago to tell time and map the way. They are physical proof of African and Egyptian presence and advanced civilization in Europe. Notably, after Sulla's Proscriptions (82 BC), the construction and transport of obelisks stopped — the genocide of the African population erased the people who built them.

🏗️ 7,000+ African Nuraghi Towers

Over 7,000 Nuraghi towers in Sardinia are the largest stone structures in the Mediterranean after the Egyptian pyramids. DNA proves Africans were there, with a North African individual found dating to ~2500 BC. The indigenous people were described as "Libyci" (Libyans) — North Africans. After the Romans arrived, construction stopped, the population disappeared, and history was rewritten. The same pattern of erasure seen with the obelisks.

🩸 A Genocide Occurred

Sulla's Proscriptions

• Names: 520+ senators and equestrians killed — including Gaius Marius the Younger, Quintus Mucius Scaevola, and Lucius Domitius Ahenobarbus.
• How they were killed: Beheaded in the Forum, thrown into the Tiber River, or hunted down in their homes.
• The Reward: Their property, estates, and wealth were given to the person who killed them — creating a new class of wealthy assassins.
• Families that grew: The Cornelii, Metelli, and Luculli families expanded their power by acquiring confiscated estates.

Second Proscriptions (43 BC)

• Names: 300 senators and 2,000 equestrians killed — including Cicero (the greatest orator of Rome), Marcus Favonius, and Gaius Antonius.
• How they were killed: Beheaded, with their heads displayed on the Rostra in the Forum. Cicero's head and hands were nailed to the speaker's platform.
• The Reward: 100,000 sesterces per head — a fortune given to the killers. Property was confiscated by the state.
• Families that grew: The Antonii, Octavii (Augustus' family), and Agrippae families rose to power on the wealth of the dead. Roman patrician families — including the Julii, Claudii, and Fabii — expanded their estates and political control.

Africans vanish by 100 AD — only show in art as slaves.
Pompeii DNA — dark-skinned people disappear from the historical record.
Nuraghi construction stops — African-built towers ceased after Roman arrival.

We found that the extreme Y-chromosome replacement seen across Europe suggests a patriarchal social structure where elite males from the incoming population held a reproductive advantage over local men—akin to the privileges historically associated with feudal lordship, such as **jus primae noctis (the lord's right to the first night).**

🍖 Cannibalism Was Practiced

Lindow Man (2,000 years old) — Manchester, England ritual sacrifice with mistletoe pollen in his stomach. Threefold death pattern matching Celtic gods Taranis, Esus, and Teutates.
Gloucestershire Pit (30 BC–130 AD) — 40 bodies, femur split for marrow extraction. "The evidence for cannibalism is irrefutable." — Dr Mark Horton.
Swiss Celtic Site (c. 2,000 years ago) — human sacrifice "an attested Celtic practice often

associated with water."
Mormont, Switzerland — human remains mixed with animal remains in cooking pots.

The Gaslighting Exposed:

When the A111T “King Sickness” mutation first appeared in the SLC24A5 gene (skin color) and then later appeared in the ALPL gene (HPP), they are connected by lineage.

Here's why:

• A111T “King Sickness” in SLC24A5 is the ancestral mutation that became fixed in European populations (~99% carry it)
• A111T “King Sickness” in ALPL is a pathogenic mutation that causes Hypophosphatasia (HPP)
• They share the exact same amino acid change — Alanine → Threonine at position 111
• The mutation in ALPL would have occurred after the mutation in SLC24A5, in the same population carrying the skin-color variant
• The same population (European/Alpine) carries both

The Logic:

If a population carries a specific mutation (A111T “King Sickness” in SLC24A5) that becomes fixed, and then the same amino acid change (A111T “The King Disease”) appears in a different gene (ALPL) in that same population — they are not "unrelated." They are genetically linked by population history.

🛡️ Ötzi The "Blade" Protector

Found in Swiss Alps (5,300 years old)
Dark skin, dark eyes — not the light-skinned European image we have been told.
No A111T “King Sickness” mutation — he was from the Alpine region and was part of the non-Celtic clan which confirms they did not have the mutation which the Gauls & Celtic clan had.
Not a cannibal — his meal was ibex, red deer, bracken fern and einkorn wheat (bread). No human flesh.
Defensive wounds on his hands — confirm he was fighting back.
Blood from four different people on his arrows — he fought multiple people, retrieve his arrow before escaping.
Shot from behind — shot in back from approximately 30 meters away.
His Bronze Axe — made with material from over 500 km away.
He got away — "He succeeded in getting away [after being shot]. Otherwise he would not still have had his weapons with him, and above all his precious bronze axe." — Dr. Anna Pedrotti.

🧬 The A111T “King Sickness” Mutation

SLC24A5 gene study — the A111T “King Sickness” allele for light skin became dominant in Gaul and Celtic populations 11,000–19,000 years ago.
Reached fixation ~5,000 years ago — the mutation became dominant.
Ötzi did not have the mutation — he was from the original dark-skinned Alpine population.
Explains approximately 35% of the skin tone difference — between Celtic clans and the rest of the world.
The Alpine region is the epicenter Genetic studies indicate the A111T “King Sickness” mutation epicenter origin is between the Middle East and the Indian subcontinent. The Alps stretch from France's Mediterranean to Romania's Black Sea, making up over 70% of the east-west span from the Middle East toward the Indian subcontinent. This confirms the European Alps as epicenter, since the Alps are squarely within that broadly defined corridor 'the Middle East toward the Indian subcontinent.' In addition, the Alps are the only mountain range that has the conditions for the A111T “King Sickness” mutation to occur after the Celtic clans' cannibalism began around 10,000 years ago.
The epicenter is the Alps mountain range, spanning from France in the west, through Switzerland, Monaco, Italy, Liechtenstein, Austria, Germany, and Slovenia, to Romania in the east.
When the A111T “King Sickness” mutation first appeared in the SLC24A5 gene (skin color)

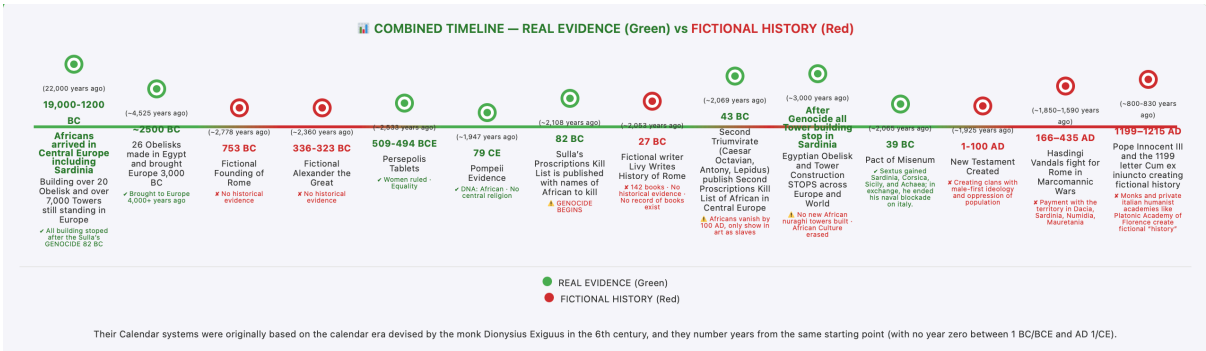

and then later appeared in the ALPL gene (HPP), then it is intuitively obvious they are connected by lineage. The gaslighting is in the denial.

📜 History was fabricated — historians admitted it

🔒 Religion was created as a control system

🔁 The pattern continues — 13 families, 208 countries, 0 equality

TIMELINE

📊 COMBINED TIMELINE — REAL EVIDENCE (Green) vs FICTIONAL HISTORY (Red)

(22,000 years ago) | 19,000-1200 BC | Africans arrived in Central Europe including Sardinia. Building over 20 Obelisk and over 7,000 Towers still standing in Europe. | ✔ **All building stoped** after the Sulla's GENOCIDE 49 BC

(~4,525 years ago) | ~2500 BC | 26 Obelisks made in Egypt and brought Europe 3,000 BC | ✔ Brought to Europe 4,000+ years ago

(~2,778 years ago) | 753 BC | Fictional Founding of Rome | ✘ No historical evidence

(~2,360 years ago) | 336-323 BC | Fictional Alexander the Great | ✘ No historical evidence

(~2,533 years ago) | 509-494 BCE | Persepolis Tablets | ✔ **Women ruled · Equality**

(~1,947 years ago) | 79 CE | Pompeii Evidence | ✔ **DNA: African · No central religio**n

(~2,108 years ago) | 82 BC | **Sulla's Proscriptions Kill List is published with names of African** to kill | ⚠️ **GENOCIDE BEGINS**

(~2,053 years ago) | 27 BC | Fictional writer Livy Writes History of Rome | ✘ 142 books · No historical evidence · No record of books exist

(~2,069 years ago) | 43 BC | Second Triumvirate (Caesar Octavian, Antony, Lepidus) publish Second Proscriptions Kill List of African in Central Europe | ⚠️ Africans vanish by 100 AD, only show in art as slaves

(~3,000 years ago) | After Genocide | all Tower building stop in Sardinia. Egyptian Obelisk and **Tower Construction STOPS across Europe and World** | ⚠️ No new African nuraghi towers built · African Culture erased

(~2,065 years ago) | 39 BC | Pact of Misenum | ✔ Sextus gained Sardinia, Corsica, Sicily, and Achaea; in exchange, he ended his naval blockade on italy.

(~1,925 years ago) | 1-100 AD | New Testament Created | ✘ Creating clans with male-first ideology and oppression of population

(~1,850–1,590 years ago) | 166–435 AD | Hasdingi Vandals fight for Rome in Marcomannic Wars | ✘ Payment with the territory in Dacia, Sardinia, Numidia, Mauretania

(~800-830 years ago) | 1199–1215 AD | Pope Innocent III and the 1199 letter Cum ex iniuncto creating fictional history | ✘ Monks and private italian humanist academies like Platonic Academy of Florence create fictional "history"

🟢 REAL EVIDENCE (Green) | 🔴 FICTIONAL HISTORY (Red)

Their Calendar systems were originally based on the calendar era devised by the monk Dionysius Exiguus in the 6th century, and they number years from the same starting point (with no year zero between 1 BC/BCE and AD 1/CE).

THE GENOCIDE OF AFRICANS IN CENTRAL EUROPE (using the colonial word "AFRICAN = Black"):

We say genocide because the DNA in Pompeii confirms Africans made up about 30,000 of the population in Pompeii — preserved by volcanic ash over time — and the 18 obelisks across Europe with Egyptian writing Vatican (1), Rome(12), Florence (2), Urbino (1), Arles (1), Istanbul (1), the Egyptians brought with them over 4,000+ years ago to tell time and map the way are still standing in Central Europe. Yet we don't see any trace of them or their families, history, or any proof of them after Sulla's Proscriptions.

The same pattern exists in Sardinia. Over 7,000 Nuraghi were built there — the largest stone structures in the Mediterranean after the Egyptian pyramids. DNA proves Africans were there, with a North African individual found dating to ~2500 BC. Historical records confirm the indigenous people were described as "Libyci" (Libyans) — North Africans. After the Romans arrived, construction stopped, the population disappeared, and the Romans rewrote history.

This means they made up the kill list of 500 senators and 3,000 people on Sulla's proscription list that Sulla Caesar ordered to be killed — their property given to the person who killed them — and removed from all records.

This is what happened in Africa during the European slave trades of African and American peoples (using the colonial words "Africa and America") from 1300 to 1900. The pattern is clear and the archaeological evidence is here.

The GREEN items show the real evidence — African/Egyptian culture (obelisks, Pompeii DNA, Sardinian Nuraghi, Persian archives) that was systematically erased.
The RED items show the fabricated Roman/Greek history — written centuries later with no contemporary evidence, and created by the same figures (Sulla, Octavian, Marcus Titius) who started the genocide.

IT IS GENOCIDE

Now we know where racism, religion, and male-first ideology originated: in what is today Switzerland, Austria, Liechtenstein, Luxembourg, France, Monaco, and Germany (the Bavarian Alps). This was the home of the original Celtic clans and this is the only place on Earth that could have had white skin, according to DNA evidence. Scientific studies show that specific genetic mutations for light skin, such as the A111T “King Sickness” allele of the SLC24A5 gene (which explains approximately 35% of the skin tone difference between these Celtics clans and rest of world), became dominant in Gaul and Celtic populations around 11,000 to 19,000 years ago and reached fixation roughly 5,000 years ago (SLC24A5 Gene Study - Nature; PubMed Study on Skin Color Genetics; Science Journal on European Skin Pigmentation). In combination of evidence of cannibalism was being practice by the Gauls and Celtics clans for religious sacrifices. It is intuitively obvious when you connect the dots, that they also practice cannibalism when they invaded the African populations in Europe. When all the archaeological evidence is used it shows that the Celts clans, represent the epicenter of this mutations not seen anywhere on eat at the time.

Connecting Dots: The archaeological evidence also shows that human cannibalism was practiced among the Celts clans, making this a epicenter of this mutations seen happening across

- **Lindow Man (2,000 years ago)**: A bog body discovered in **Manchester, England** in the 1980s with a carefully staged ritual sacrifice. Archaeologist Miranda Aldhouse-Green explained: "You've got a rope tightened round his neck, and at the moment where the neck was constricted, the throat was cut, which would cause an enormous fountain of blood to rise up." This threefold death pattern matches the Celtic belief in three powerful gods—Taranis (death by burning or axe), Esus (death by hanging or stabbing), and Teutates (death by drowning). Lindow Man's death was "planned as a sacrifice to all three gods at once." The presence of mistletoe pollen in his stomach is highly suggestive given the many druidical associations with mistletoe—a poisonous plant unlikely to have been ingested accidentally. His gut also contained charred oatmeal, linking him to a ritual where a charred cake was used to select the sacrificial victim, a tradition that has endured in the hot cross bun. 🔗 Smithsonian Magazine — Lindow Man (1988)
- **Gloucestershire Pit (30 BC – 130 AD), England**: Archaeologists led by Mark Horton of Bristol University unearthed a pit containing around 40 bodies. One thigh bone was found split lengthways with the marrow scraped out—"the only reason you would want to extract the marrow is to eat it." Mark Horton stated, "The evidence for **cannibalism is irrefutable.**" The remains show evidence of a mass sacrifice. 🔗 New Scientist — Gloucestershire Pit Cannibalism (2001) | The Independent
- **Swiss Celtic Site (c. 2,000 years ago):** A recent Swiss National Science Foundation study investigated 20 Celtic skeletons found near a bridge in the Three Lakes region of Switzerland. The study noted that human sacrifice was "an attested Celtic practice often associated with water," showing the same ritual patterns were present in the Alpine Celtic homeland, not just Britain. 🔗 Swiss National Science Foundation — Swiss Celtic Site (2024)
- **Herxheim bei Landau, Germany — Early Celtic Ritual Cannibalism (c. 5000 BC):** Massive scale: 500–1,000 individuals spanning **over a 50 to 300 year period.** Ritual treatment: Bones treated, skulls shaped into bowls, tongues cut out, long bones split for marrow. The victims were not local — based on DNA evidence and strontium isotope analysis, they came from multiple distant regions, suggesting they were captives brought to Herxheim for ritual consumption.

  Connecting Dots: We find evidence of early Celtic culture in the Alps region dating back over 5,000 years ago. Archaeologic and linguistic evidence confirm these were the early Celtic clans. Herxheim sits in the same Central European region where this continuous chain of Celtic ancestry formed, proving the practice of ritual cannibalism was embedded in the early Celtic cultures that would become the Celts. This also confirms the timeline to fixation being 19,000 to 5,000 years ago. 🔗 Herxheim (archaeological site)

The evidence shows that around 800 BC, they started hunting people with black skin who made up the rest of the world as farmers (the Iron Age, as they called it in what is now called Europe; the start of the hunters clans of Gauls and Celtics chiefdoms of the Alps regions). Six clans from the mountains created six clans wherever they conquered – they didn't take prisoners, they took control, and then they moved on. This connects to the genocide pattern using facts. They are the 13 arrows on the US dollar: 6 original Celtic/Gaul families, 6 Roman families, and the middle is the judge (Vatican Church) family. The same pattern appears in Japan – the samurai are fighting clans that we found go back to the original 6 families of clans that fought to form what is today Japan. The Japanese religion uses the same symbols we saw in the Alps.

We say genocide because that is what it was. When you murder millions of people, their culture, their history, their future, that is the systematic murder of a people and the destruction of their civilization. The DNA proves they existed. The structures prove they built. **Caesar Sulla's Proscriptions kill list (82 BC)** and the **Second Proscriptions (43 BC) kill lists prove they were murdered**. The **Pompeii DNA evidence** shows that the population was of Eastern Mediterranean and North African ancestry — dark-skinned people — before the Roman erasure. This confirms the pattern: dark-skinned people were in Europe, they were targeted, and they disappeared from the historical record. Supporting Evidence — Pompeii DNA (2024): 🔗 New Scientist — Pompeii DNA Rewrites History (2024) | Smithsonian Magazine. The fake histories prove the murderers rewrote fictional history to cover everything. The fictional creation of Rome books, religion and male-first ideology proves they created a new ideology to control the survivors. The pattern proves they keep doing it. We are not making this up. The evidence is there for anyone who wants to see it. The only thing that has been missing is the courage to see it for what it is.

DECOLONIZE THE WORLD — FROM HIERARCHY TO EQUALITY FOR ALL PEOPLE.

Connecting The Dots: 🗺️ The Europe Alpine Epicenter — Physical Proof

By connecting the dots of all the evidence it is Intuitive Obvious to see that the Alpine region is the Epicenter of this deadly mutation. The Alps of Switzerland, Austria, Germany, and France. This is where the Celtic clans originated, where the A111T “King Sickness” mutation reached fixation, and where the archaeological evidence of cannibalism has been found.

In 1991, hikers in the Ötztal Alps discovered a 5,300-year-old human, naturally preserved in the ice — **Ötzi the “Blade Protector”**. He is the physical proof from the Alpine epicenter.

🧬 What the DNA Revealed

A 2012 nuclear DNA analysis revealed he had brown eyes, type O blood, and was lactose intolerant (Nature Communications, 2012). He had dark skin, dark eyes, and was balding — not the light-skinned European image we have been told (Current Biology, 2023).

🚫 No A111T “King Sickness” Mutation

Ötzi did not carry the A111T “King Sickness” allele of the SLC24A5 gene. His DNA shows he was from the original Alpine population — black-skinned, dark-eyed — before the mutation reached fixation (Nature, 2012; SLC24A5 Gene Study).

🍖 What He Ate

Ötzi's last meal, eaten about two hours before his death, consisted of:
• Fatty meat from ibex and red deer
• Einkorn wheat — showing he was from farming community
• Burnt griddlecake- showing he baked bread and was connected to farming.
No human flesh. He was not a cannibal (Nature Communications, 2012).

🛡️ A "Blade" Protector, Not Hunter

Ötzi had defensive wounds on his hands and wrists — he was fighting back (Journal of Archaeological Science, 2016). Blood from four different people was found on his arrows by him — he fought multiple people (Nature, 2003). He did not eat people — he protected against them.

🏹 Shot From Behind
A flint arrowhead was found embedded in his left shoulder, under his shoulder blade. CT scans show the arrow entered from behind, ripping through nerves and major blood vessels (Journal of Archaeological Science, 2016). He was shot from approximately 30 meters away.

🪓 The Bronze Axe
The copper used in his axe blade was not local to the Alps. Scientific analysis of lead isotopes proved the metal originated in Southern Tuscany, Central Italy — over 500 kilometers (300 miles) away (Nature, 2011). He had traveled or traded across the region that would later become the Roman Empire.

✅ He Got Away
As Dr. Anna Pedrotti of the University of Trento stated: "He succeeded in getting away [after being shot]. Otherwise he would not still have had his weapons with him, and above all his precious bronze axe." (University of Trento)

📌 What This Proves
Ötzi was a dark-skinned protector from the Alpine epicenter. He did not have the A111T “King Sickness” mutation. He was not a cannibal. He fought multiple people and was shot from behind. He got away and died alone. He is physical proof that the original Alpine population was dark-skinned, and the A111T “King Sickness” mutation was not present in them. The mutation came later — through cannibalism.

🧬 Black-skinned Alpine population — 5,300 years ago
🔪 Bronze axe from Tuscany — over 500 km away
✅ He got away after being shot
✅ Died alone — physical proof
⚠️ He was not a cannibal

The Problem is that Hierarchical Systems Create Learned Mental Sickness, Antisocial (ASPD) and Narcissistic (NPD) Personality Disorder

Religious hierarchies, monarchies, corporate structures, and authoritarian governments systematically cultivate Antisocial (ASPD) and Narcissistic (NPD) Personality Disorder sickness. These sickness are learned disorders and the capitalist systems reward inequality, poverty, slavery, colonization, and exploitation. Let's all build the EQUALITY system and dismantle Authoritarian Power Structures.

FROM HIERARCHY TO EQUALITY OF ALL PEOPLE.

OUR ANSWERS — HOW WE CAN STOP THEM

📜 1. Their Capitalist System is Built on Lies
The Old Testament, New Testament, and Quran were all created by the same families who committed genocide. They are human-made control systems.
The counter: Expose this openly. The more people know, the weaker the ideology becomes.

Proof: Livy, Thucydides, Athanasius (367 AD), Quran compiled decades later.
Strategy: Mass education. The internet is the one tool they cannot fully control.

👥 2. **13 vs 8 Billion**
Their power comes from control, not numbers. They rely on people believing they are "chosen" or "divine."
The counter: Unity. They divide us by race, religion, gender, nationality.
What they fear: A global movement that crosses all divisions. Their system collapses overnight.
Strategy: Build alliances across every boundary. The moment people realize they are all being controlled by the same 13 families, the power shifts.

🧱 3. **Walls of Knowledge**
The Chinese built the wall to protect themselves. It worked for over 2,000 years.
The counter: Build "walls" of knowledge, not stone. Protect your mind from their ideology.
Strategy: Decolonize your mind. Reject their books. Reject their history. Reject their hierarchy.
Build your own knowledge systems.

⚔️ 4. **Turn Their Minions**
Their power is enforced by minions. But minions follow power, not ideology.
The counter: Disrupt the economic system that pays them. Their wealth comes from exploitation.
Strategy: Build the equality system. Decentralized. Cooperative. Non-hierarchical.
Peopleize World

🏛️ 5**. History on Our Side**
For 20,000 years, people lived in equality. Women ruled alongside men. No warfare. That is the natural human state.
The counter: Remember who we were before they came. The evidence is still standing — obelisks, Nuraghi towers, Pyramids, DNA, Persepolis tablets.
Strategy: Rebuild what they destroyed. Re-learn the knowledge they burned. The structures remain — we can learn from what they left behind.

THE SIMPLE ANSWER

Stop them by exposing them.

They rely on secrecy, lies, and division. If you take away all three, they have nothing.

- Expose the 13 families and their history
- Educate every person you can reach
- Unite across all boundaries — race, religion, nationality
- Build alternative systems that do not depend on their money, their books, or their approval
- Refuse to play their game

THE ONE THING THEY CANNOT SURVIVE

THE TRUTH.

Their entire system is built on lies. The moment enough people see the truth, the system collapses.

The truth has been found. Now it just needs to be shared.

The platform is built. The system works. Come join the movement.

DECOLONIZE THE WORLD — FROM HIERARCHY TO EQUALITY FOR ALL PEOPLE.

✊🏿✊🏾✊🏽✊🏼✊🏻 ALL PEOPLE — ALL RACES — ALL PEOPLE — EQUALITY FOR ALL

WE HAVE DECODED THE DAVINCI LAST SUPPER PAINTING

The group portia of the Celtic Clan chiefdom of old from Alps and new after Sulla's genocidal purge list.

Valerii, Manlii, Fabii, Cornelii, Claudii, Julii, Taurini, Aemilii, Senones, Boii, Insubres, Lingones, Cenomani, Carni, Gesati, Taurini

THE 13 PATTERN: 6 + 1 + 6 = 13

A recurring structural pattern appears throughout history: 6 + 1 + 6 = 13. This template appears across multiple power structures and traditions—not coincidence, but design.

The pattern manifests as: 6 on one side, 1 in the center, and 6 on the other. This appears in the 12 Celtic Clan chiefdom with their High King, the 6 Roman patrician families with their "hidden" 7th (the adopted lineage), and the Rothschild structure of 1 father with 5 sons forming a unified network of 6.

The most famous visual representation of this structure is **Leonardo da Vinci's The Last Supper.** The apostles are arranged in four groups of three, but the composition is built around a central axis of the portia of the Celtic Clan chiefdom of old from Alps and new after Sulla's genocidal purge list. The family names are Valerii, Manlii, Fabii, Cornelii, Claudii, Julii, Taurini, Aemilii, Senones, Boii, Insubres, Lingones, Cenomani, Carni, Gesati, Taurini.

In the position of Left, Far Back is Bartholomew, of the family Valerii, which is Marcus Valerius Messalla Niger (the older Sabine family), who lived from c. 104 BC to c. 50 BC and was Consul in 61 BC and censor in 55–54 BC, and was one of the most distinguished members of the Valerii in the late Republic.

In the position of Left, Middle Back is James the Lesser, of the family Manlii, which is Gaius Manlius Valerius (the ancient patrician clan), who lived from c. 100 BC to c. 50 BC? and was a figure from the Catiline conspiracy around c. 63 BC, and the Manlii were one of the gentes maiores and were known for repelling the Celts.

In the position of Left, Close Back is Andrew, of the family Fabii, which is Publius Fabius Maximus (the ancient Celtic patrician clan), who lived from c. 95 BC to c. 45 BC? and was a candidate for the aedile in 52 BC according to Cicero's Epistulae ad Familiares 2.2, and was a member of the ancient Fabii who claimed descent from Hercules.

In the position of Left, Far Front is Judas Iscariot, of the family Cornelii, which is Lucius Cornelius Lentulus Crus (Sulla's family, the "caesar that made first genocide purge list"), who

lived from c. 98 BC to 48 BC and was Consul in 49 BC, and was a member of the powerful Cornelii who produced Sulla, and the Cornelii created the first proscription lists in 82 BC, killing 520+ senators and equestrians.

In the position of Left, Middle Front is Peter, of the family Claudii, which is Appius Claudius Pulcher (the family that produced emperors), who lived from 97 BC to 49 BC and was Consul in 54 BC and censor in 50 BC, and was head of the most powerful branch of the Claudii and produced emperors Tiberius, Claudius, Nero, and Nerva.

In the position of Left, Close Front is John, of the family Julii, which is Gaius Julius Caesar adopted "Octavianus as son" name became Gaius Julius Caesar Octavianus (the "woman-like" figure, the adopting son into family line), who lived from 63 BC to 14 AD and was adopted as Gaius Julius Caesar Octavianus in 44 BC, and is the "beloved disciple" who was adopted into the Julian family, just as Octavian was adopted by Julius Caesar.

In the Center is Jesus, of the family Taurini, which is Celto Taurini Ligurian The Judge "Jesus" are the hidden clans, the "hidden" clan that spied and then ruled the Turin region on the border entrance to Alps, and they are a Celtic clan that ruled Turin and are the "Hidden 7th" — Celtic Clan spies becoming rulers after Sulla's purge.

In the position of Right, Close Front is Thomas, of the family Aemilii, which is Lucius Aemilius Paullus (the family that crushed the Carni), who lived from c. 100 BC to 48 BC and was Consul in 50 BC, and was one of the five gentes maiores, and in a fictional battle Marcus Aemilius Scaurus defeated the Carni in 115 BC.

In the position of Right, Middle Front is James the Greater, of the family Gallic Senones, which is the Gallic Seine-et-Marne Celtic Clan that fictionally sacked Rome in 390 BC, and Brennus from the 4th century BC led the Senones in the sack of Rome in 390 BC, and the Celtic clan originated from Seine-et-Marne, France and ruled on the Adriatic coast, and was leader Seine-et-Marne in 50 BC.

In the position of Right, Far Front is Philip, of the family Boii, which is Burebistas Cisalpine Boii (the Celtic Clan that ruled Bologna region), and the Boii ruled "Bologna (Bononia) and Bohemia."

In the position of Right, Close Back is Matthew, of the family Insubres, which is Mediolanum Celtic Clan (the Celtic Clan that ruled Milan), and the Insubres Celtic Clan ruled Milan (Mediolanum) around 600 BC and they were the most considerable of the Celtic Clan in Italy, and was Mediolanum leader.

In the position of Right, Middle Back is Thaddeus, of the family Gallic Lingones, which is the Celtic clan that ruled the Ferrara region, and the Lingones ruled in the Po delta Ferrara and Rovigo region.

In the position of Right, Far Back is Simon the Zealot, of the family Cenomani, which is Elitovius Cenomani Bellovesus, the tribe that allied with Rome, and Elitovius Cenomani Bellovesus led the Cenomani across the Alps, and the Cenomani ruled Brescia and Verona region.

The Carni and Gesati are the "minion Celtic clans" the ones that do not fit neatly into the 12 positions but support and spies to be part of Celtic Clans, and these are the "Hidden, Spy, minions" clan that were not directly part of the celtic patrician system but were still absorbed.

TABLE 1: THE 12 APOSTLES + JESUS = 13

POSITION	APOSTLE	FAMILY / CELTIC CLAN	DATE & NOTES
Left, Far Back	Bartholomew	Valerii = Marcus Valerius Messalla Niger (the older Sabine family)	Marcus Valerius Messalla Niger (c. 104 BC – c. 50 BC). Consul in 61 BC, censor in 55–54 BC. One of the most distinguished members of the Valerii in the late Republic.
Left, Middle Back	James the Lesser	Manlii = Gaius Manlius Valerius (the ancient patrician clan)	Gaius Manlius Valerius (c. 100 BC – c. 50 BC?). A figure from the Catiline conspiracy (c. 63 BC). The Manlii were one of the gentes maiores and were known for repelling the Celts.
Left, Close Back	Andrew	Fabii = Publius Fabius Maximus (the ancient Celtic patrician clan)	Publius Fabius Maximus (c. 95 BC – c. 45 BC?). Candidate for the aedile in 52 BC (Cicero, Epistulae ad Familiares 2.2). A member of the ancient Fabii, who claimed descent from Hercules.
Left, Far Front	Judas Iscariot	Cornelii = Lucius Cornelius Lentulus Crus (Sulla's family, the "caesar that made first genocide purge list")	Lucius Cornelius Lentulus Crus (c. 98 BC – 48 BC). Consul in 49 BC. A member of the powerful Cornelii, who produced Sulla. The Cornelii created the first proscription lists (82 BC), killing 520+ senators and equestrians.
Left, Middle Front	Peter	Claudii = Appius Claudius Pulcher (the family that produced emperors)	Appius Claudius Pulcher (97 BC – 49 BC). Consul in 54 BC, censor in 50 BC. Head of the most powerful branch of the Claudii. Produced emperors Tiberius, Claudius, Nero, and Nerva.

Left, Close Front	John	Julii = Gaius Julius Caesar adopted "Octavianus as son" name became Gaius Julius Caesar Octavianus (the "woman-like" figure, the adopting son into family line)	Gaius Octavius (63 BC – 14 AD), adopted as Gaius Julius Caesar Octavianus in 44 BC. The "beloved disciple" who was adopted into the Julian family, just as Octavian was adopted by Julius Caesar.
Center	Jesus	Taurini = Celto Taurini Ligurian The Judge "Jesus" are the hidden clans. The "hidden" clan that spied and then ruled the Turin region, on the boarder entrance to Alps.	A Celtic clan that ruled Turin. The "Hidden 7th" — Celtic Clan spies becoming rulers after Sulla's purge.
Right, Close Front	Thomas	Aemilii = Lucius Aemilius Paullus (the family that crushed the Carni)	Lucius Aemilius Paullus (c. 100 BC – 48 BC). Consul in 50 BC. One of the five gentes maiores. Fictional battle Marcus Aemilius Scaurus defeated the Carni in 115 BC.
Right, Middle Front	James the Greater	Gallic Senones = Gallic Seine-et-Marne Celtic Clan that fictionally sacked Rome in 390 BC	Brennus (4th century BC). Led the Senones in the sack of Rome in 390 BC. The Celtic clan originated from Seine-et-Marne, France, and ruled on the Adriatic coast. Leader Seine-et-Marne in 50 BC.
Right, Far Front	Philip	Boii = Burebistas Cisalpine Boii (the Celtic Clan that ruled Bologna region)	The Boii ruled "Bologna (Bononia) and Bohemia."
Right, Close Back	Matthew	Insubres = Mediolanum Celtic Clan (the Celtic Clan that ruled Milan)	The Insubres Celtic Clan ruled Milan (Mediolanum) around 600 BC. They were the most considerable of the Celtic Clan in Italy. Mediolanum leader.

Right, Middle Back	Thaddeus	Gallic Lingones (the Celtic clan that ruled the Ferrara region)	The Lingones ruled in the Po delta Ferrara and Rovigo region.
Right, Far Back	Simon the Zealot	Cenomani = Elitovius Cenomani Bellovesus (the tribe that allied with Rome)	Elitovius Cenomani Bellovesus Led the Cenomani across the Alps. The Cenomani ruled Brescia and Verona region.

THE "MINION" CELTIC CLAN: CARNI, GESATI, AND THE VATICAN

The Carni and Gesati are the "minion Celtic clans" the ones that do not fit neatly into the 12 positions but support and spies to be part of Celtic Clans. These are the "Hidden, Spy, minions" clan that were not directly part of the celtic patrician system but were still absorbed.

THE JUDAS = CORNELII CONNECTION
Judas is the "betrayer" who hands over the "king" to the authorities.
Octavian is the "betrayer" who eliminated the Republic and established the Empire.
Judas's role is to break the power structure by delivering Jesus to the Romans.
Octavian's role is to break the Republic and deliver it to the patrician families.
The "bag of money" given to Judas in the painting mirrors the pattern of wealth transfer: the proscriptions were used to redistribute wealth to the six families.
THE JOHN = JULIA CONNECTION
The Julia family was the adopted line of Julius Caesar.
John is the "beloved disciple" who is adopted by Jesus on the cross.
Julius Caesar adopted Octavian, making him a "son" and continuing the Julian line.
John in the painting is shown leaning on Jesus, just as Octavian was adopted into the Julian family.
The pattern is not about religion—it is about power. The 13 is a structural template for how power is organized: 6 on one side, 6 on the other, and the "1" in the center as the unifying lineage or adopted heir.

🔗 **CONNECTING THE DOTS**
THE PRINCELY SEATS (c. 800-450 BC)
Long before the fictional history creation of Rome, the early Celtic dynasties built powerful fortified centers known as "princely seats" (Fürstensitze). These were the first cities north of the Alps—centers of trade, craft, and political power that served as the foundation for the

SITE LOCATION SIGNIFICANCE

Ipf
Germany
A fortified hilltop settlement similar to the Heuneburg, currently being studied for its role in the centralization processes that created the Celtic dynasties.

Glauberg
Germany

A renowned site featuring a "princely" burial chamber and associated with a honey-source area of over 50 km radius. The famous "Glauberg Prince" statue was found here.

Hohenasperg
Germany
A site near Ludwigsburg famous for its large burial mounds and rich tombs. The nearby "Hochdorf Chieftain's Grave" (c. 530 BC) contained one of the richest burials from this period.

Heidenmauer
Germany
Located near Bad Dürkheim, this is another significant "princely seat" from this period, part of a rich early Celtic settlement landscape.

Mont Lassois
France
A proto-urban centre near Vix in Burgundy, containing a Mediterranean-influenced, palace-like building. This was the seat of the "Lady of Vix" (c. 500 BC).
These princely seats represent the height of Celtic power before the transitioned into their new Roman fictional conquest. They were the centers where the chiefdom that would later behind the genocide of world and later in stories as the so called Roman system first emerged.
The famous **Mona Lisa** painting which represents "**Lady of Vix** chiefdom line" was painted by Leonardo da Vinci around 1506 and gave it to Lisa Camilla di Antonmaria Gherardini, who was an Italian noblewoman of the Gherardini family how ruled Florence and Tuscany. This connected their chiefdom back to "Lady of Vix chiefdom line".
Leonardo da Vinci made a connection to a location and chiefdom in 1506 (over 400 years before the Vix Grave: Excavated in 1953 by René Joffroy was found. The location Mont Lassois and her chiefdom including location painted by Leonardo da vinci under name **"Mona Lisa".**

SYMBOLS FOUND AT CELTIC SITES
The archaeological record reveals a remarkable pattern: many symbols now associated with later religions—Christianity, Judaism, and even Islam—were present in the Celtic world centuries earlier. This suggests these symbols were not invented by these religions but were adopted and repurposed from an older, shared visual language.

SYMBOL WHERE FOUND DATE ORIGINAL CELTIC MEANING
Cross
Various sites including the Glauberg and Mont Lassois; early "pre-Christian" crosses in Ireland and Britain
Pre-Christian era, later adapted into "High Crosses" from 9th-12th c.
Often represented solar or celestial power. Christianity later integrated this familiar symbol to represent the Holy Trinity.
Swastika
2,300-year-old sword in a Celtic necropolis at Creuzier-le-Neuf, France
4th-3rd c. BC
A mark of good fortune, health, and prosperity. Widely used across the ancient Mediterranean and adopted by Celts in the late 5th c. BC.
Six-Pointed Star
Incised on a Celtic penannular brooch from Ravel, Lough, Ireland
5th-6th c. AD
An indigenous Celtic motif predating widespread Jewish association. The star has been used across many cultures as a symbol of celestial power and unity.

Triskele/Triskelion
Found at the 5,000-year-old Newgrange Passage Tomb, Ireland, and across the Celtic world Neolithic period (c. 4000 BC)
Represents concepts of motion, cycles, and the trinity of spiritual concepts: life-death-rebirth. Christianity later adopted this symbol to represent the Holy Trinity.
Crescent Moon
Carved into the top of a 2,300-year-old Celtic sword blade from Creuzier-le-Neuf, France 4th-3rd c. BC
A celestial symbol, often combined with solar imagery (the cross or star). This symbol predates its widespread Islamic association.

SYMBOL
CELTIC EVIDENCE (EARLIEST)
SHINTO (JAPAN)
BUDDHISM
HINDUISM
Swastika
Celtic sword, France (4th-3rd c. BC). Used as a mark of good fortune. Widely adopted across the ancient Mediterranean from Celtic sources.
Known as "Manji," representing good luck and eternity. Appears on statues and shrines.
Represents footprints of the Buddha; wisdom and compassion.
Represents the sun god Surya and the four directions.
Six-Pointed Star
Celtic brooch, Ireland (5th-6th c. AD). Indigenous Celtic motif predating widespread Eastern use.
Found in **Shinto** iconography as the Kagome crest, representing interconnectedness.
Represents union of wisdom and compassion in the Dharmachakra.
Represents union of Purusha (spirit) and Prakriti (matter).
Triskele/Triskelion Newgrange Passage Tomb, Ireland (c. 4000 BC). Represents motion, cycles, and the trinity of life-death-rebirth.
Tomoe symbol, representing three cycles of time and the flow of energy.
Represents the Three Jewels: Buddha, Dharma, Sangha.
Trishula of Shiva, representing three aspects of time.
Cross
Glauberg and Mont Lassois sites, Germany/France (pre-Christian era). Represented solar and celestial power. Later integrated into Christian iconography.
Combined with jewel-like forms, representing connection between heaven and earth.
Dharmachakra with eight spokes, representing the Noble Eightfold Path.
Swastika variant, representing the four cardinal directions.
Crescent Moon
Celtic sword blade, France (4th-3rd c. BC). A celestial symbol often combined with solar imagery (cross or star).
Associated with the moon goddess Tsukuyomi, representing cycles of time.
Represents moon's phases as a symbol of spiritual growth.
Crescent on Shiva's head represents the cycle of time.
The evidence is clear: The symbols of the Cross, Swastika, Six-Pointed Star, Triskele, and Crescent Moon have their earliest documented appearances in Celtic Clan in the Alps dating to around 500 BC. The Celts were the originators of this symbol set, which then invaded into Central Europe over Alps, then into Italy and across the world. The appearance of these same symbols in Shinto, Buddhism, and Hinduism is not evidence that the Celts "inherited" them—it is evidence that the Celts carried them there.
The Migration Pattern: The Gundestrup Cauldron, a major Celtic artifact from the La Tène period, features a god depicted squatting in what scholars have called "Buddhist fashion"—

not because Buddhism influenced the Celts, but because the Celts brought their iconography with them as they killed and conquered across Asia. The same pattern is visible in the symbols: the Celts were the source, not the recipients.

What this reveals: The symbols now associated with Christianity, Judaism, and Islam were part of an indigenous visual language that predates these religions by thousands of years. Christianity, when it spread to Ireland and Britain, integrated these familiar symbols into its own iconography, repurposing them to represent concepts like the Holy Trinity.

SYMBOLS IN EASTERN RELIGIONS — SHINTO, BUDDHISM, HINDUISM
The symbols found in the Celtic archaeological record from 500 BC show symbols of the Cross, Swastika, Six-Pointed Star, Triskele, and Crescent Moon, all later seen in Shinto, Buddhism, Hinduism, Islam, Judaism and Christianity. The Celtic examples are the earliest documented, showing these symbols originated with the Celts and were carried eastward as they migrated and traded across the ancient world—just as they carried their culture into Italy after the genocide. The Celtic homeland in the Alps—encompassing modern Austria, southern Germany, Switzerland, and eastern France—was the only region on Earth where the white skin mutation originated and became dominant, as confirmed by genetic and archaeological evidence. From this isolated Alpine region, the Celts carried their symbols with them on their invasions and genocide of Central Europe, African and into the rest of the world, along with their Greek and Latin language.

Summary Table with Sources

Each verdict is supported by academic research. Sources are cited so you can verify the evidence yourself.

Topic	Claim / Narrative	Verdict	Source / Evidence
The Exodus	Hebrews were enslaved in Egypt and liberated by Moses.	Fiction (Lie)	No Egyptian records. Written centuries later. Cambridge University confirms accounts come from "late derivative writers" with "propagandist" purposes.

Old Testament	A historical record of ancient Israel.	Fiction (Lie)	Retroactive propaganda to centralize male authority. Scholarly consensus: Torah was "created as an ideal tool for creating religious and political cohesion through propaganda."
New Testament	A historical record of Jesus and early Christianity.	Fiction (Lie)	No contemporary evidence. Paul's letters are theological directives, not history. Society for Classical Studies confirms omens reported for events were "fabrications created after the event."
Rome's Founding	Romulus founded Rome in 753 BCE.	Fiction (Lie)	No historical evidence. Date was calculated by Varro in the 1st century BCE. Romulus is a myth.
Rome's Kings	7 kings ruled Rome from 753–509 BCE.	Fiction (Lie)	No historical records. List was invented by later historians.
The Roman Republic	Founded in 509 BCE after overthrowing Tarquin.	Fiction (Lie)	No historical evidence. The story is a later invention.
The Roman Senate	A male-only governing body from the beginning.	Fiction (Lie)	The word senex means "old person"—mostly women originally. Later changed to a male-only body.

Livy's History	A reliable account of Rome's early history.	Fiction (Lie)	Wrote 700+ years after the events. Politically motivated. Admitted to using fictional myths. University of Colorado confirms his aim was moral exempla, not factual history.
Dionysius's History	A reliable account of Rome's early history.	Fiction (Lie)	Wrote to reconcile Greeks to Roman rule. Admitted to using "fictional" history for political purposes.
The First Triumvirate	Caesar, Pompey, Crassus formed an alliance in 60 BCE.	Fiction (Lie)	No historical evidence (Cicero's letters) confirms some alliance, but details are from fictional sources.
Julius Caesar	A real person who ruled Rome and was assassinated in 44 BCE.	Fiction (Lie)	Coins and inscriptions prove someone existed with that name. But the story of his life, assassination, and rule comes from fictional sources. Society for Classical Studies confirms "almost all the omens reported... were fabrications created after the event."
Caesar's Assassination	Killed by senators on the Ides of March, 44 BCE.	Fiction (Lie)	The story comes from later writers — no historical records.

The Battle of Actium	Octavian defeated Antony and Cleopatra in 31 BCE in Greece.	Fiction (Lie)	Coins and inscriptions prove Octavian existed. The narrative comes from later writers (Plutarch, Dio). University of Florida confirms Roman propaganda used sexism to delegitimize Cleopatra.
Alexander the Great	Conquered the Persian Empire in the 4th century BCE.	Fiction (Lie)	No historical records. Cambridge University: Accounts come from "late derivative writers who saw Alexander through the filter of centuries of rhetoric and philosophy" with "propagandist" purposes.
Cleopatra VII	Last pharaoh of Egypt, ruled 51–30 BCE.	Fiction (Lie)	The story is Roman propaganda. University of Florida (UFAM): "the image of Cleopatra VII was largely shaped and distorted by Roman political and cultural discourses" — "sexism and xenophobia were mobilized as instruments of political delegitimization."

Pompeii	The city existed and was buried by a volcanic eruption. Rome "conquered" or "controlled" Pompeii as part of its empire.	Fact (city & eruption) / Fiction (Roman conquest narrative)	Fact: The physical remains of Pompeii are real. Population was around 30,000 with majority people living in city of African DNA. A wealthy city with each house having its own house goddess/god. No evidence of Jewish or Christianity. The eruption covered the city and protected it, giving us the proof to confirm the fictional lie of Rome's conquest of it. Fiction: The narrative that Rome "conquered" or "controlled" Pompeii as part of its empire comes from Roman writers like Pliny. No historical evidence supports the claim that Rome ruled Pompeii before the eruption. The story is Roman propaganda. No historical evidence of Jewish or Christianity religion in Pompeii.

Persepolis Fortification Tablets	Achaemenid Persia was a male-dominated empire that was "conquered" by Alexander the Great or replaced by Rome.	Fact (tablets & women's power) / Fiction (conquest narrative)	Fact: The Persepolis Fortification Tablets (509–494 BCE) prove that a culture of people lived and women held substantial economic power—managing estates. It showed equality in cultural interaction and with no historical evidence of any Greek or Roman presence. University of Chicago: "women were not confined to the household but participated in economic production." Fiction: The narrative that Persia was a male-dominated empire that was "conquered" by Alexander the Great or that Rome replaced it. No historical evidence supports these conquest narratives. They are later inventions.

The "Men First" Ideology	A deliberate project to erase women and centralize male power.	Fact	Consistent across Roman law, Greek philosophy, the Bible, and early Church history. UFAM confirms Roman propaganda used sexism to delegitimize powerful women. Persepolis Fortification Tablets prove women held substantial economic power before male centralization.
Women's Councils	Women ruled in council groups before male centralization.	Fact	Cross-cultural evidence (burials, ethnographic records) supports this pattern. Persepolis Fortification Tablets (509–494 BCE) prove women ruled and held substantial economic power in Persia before the male-dominated systems replaced them.
Coins as "Proof"	Coins prove historical events.	Fiction (Lie)	Coins are propaganda. Union College confirms Augustan coinage was "the most efficient and successful way" to promote a "political propaganda campaign."

SITE	LOCATION	SIGNIFICANCE

Ipf	Germany	A fortified hilltop settlement similar to the Heuneburg, currently being studied for its role in the centralization processes that created the Celtic dynasties.

Fact (city & eruption) / Fiction (Roman conquest narrative)	Fact: The physical remains of Pompeii are real. Population was around 30,000 with majority people living in city of African DNA. A wealthy city with each house having its own house goddess/ god. No evidence of Jewish or Christianity. The eruption covered the city and protected it, giving us the proof to confirm the fictional lie of Rome's conquest of it. Fiction: The narrative that Rome "conquered" or "controlled" Pompeii as part of its empire comes from Roman writers like Pliny. No historical evidence supports the claim that Rome ruled Pompeii before the eruption.

Persepolis Fortification Tablets	Achaemenid Persia was a male-dominated empire that was "conquered" by Alexander the Great or replaced by Rome.	Fact (tablets & women's power) / Fiction (conquest narrative)	Fact: The Persepolis Fortification Tablets (509–494 BCE) prove that a culture of people lived and women held substantial economic power—managing estates. It showed equality in cultural interaction and with no historical evidence of any Greek or Roman presence. University of Chicago: "women were not confined to the household but participated in economic production." Fiction: The narrative that Persia was a male-dominated empire that was "conquered" by Alexander the Great or that Rome replaced it. No historical evidence supports these conquest narratives.

The "Men First" Ideology	A deliberate project to erase women and centralize male power.	Fact	Consistent across Roman law, Greek philosophy, the Bible, and early Church history. UFAM confirms Roman propaganda used sexism to delegitimize powerful women. Persepolis Fortification Tablets prove women held substantial economic power before male centralization.

Women's Councils	Women ruled in council groups before male centralization.	Fact	Cross-cultural evidence (burials, ethnographic records) supports this pattern. Persepolis Fortification Tablets (509–494 BCE) prove women ruled and held substantial economic power in Persia before the male-dominated systems replaced them.
Coins as "Proof"	Coins prove historical events.	Fiction (Lie)	Coins are propaganda. Union College confirms Augustan coinage was "the most efficient and successful way" to promote a "political propaganda campaign."

Step	What Was Created	How It Was Framed	Fictional (lie into religion)

1a	A fake origin story	Alexander the Great was invented as a "Greek" conqueror to establish a male-only ideology.	Daniel 11:3 (prophetic retrojection); later Hellenistic histories — all fictional. 📚 Cambridge University
1b	The Old Testament	Created a male-only god with no name ("I AM") who created everything. Women and all others are subjects to men.	Genesis (patriarchal lineage); Exodus, Leviticus, Numbers (male priesthood, Temple tax); Deuteronomy (covenant code); Historical books (fake unified history) — all
1c	Reality check	The text itself and its ideology were the problem. It was male-only and not equal.	Men died early; women lived longer and accumulated wealth and power after their husbands died. The priestly system tried to control women through law, but biology and reality
1d	It didn't work	The male-only system kept failing because reality (women living longer, managing households, inheriting property) kept undermining it.	The Old Testament system was never stable because it was built on a lie — that men should control

The Pattern

The Old Testament contains a consistent pattern of male-first ideological racket:

1. Origin: A creation narrative that makes woman derivative of man establishes the hierarchy as "natural" and "divine"
2. Enforcement: A legal system with clear threats and rewards, enforced violently against internal deviants
3. Retroactive justification: Laws, histories, and reforms are presented as ancient traditions when they serve current power interests
4. Propaganda: The entire narrative was produced by a scribal/political class to

Story	The Racket Element	How It Works
Creation (Genesis 2)	Male-first hierarchy	Woman created from man, as "helper" — establishes male primacy as divine order
Circumcision (Genesis 17)	Male-only covenant sign	"Transmission of power and authority through the male" — women excluded from the sign
Conquest (Deuteronomy, Exodus)	Threat-enforcement	"Obey and be blessed; disobey and be destroyed" — internal enforcement against relatives who deviate
Josiah Reforms (2 Kings 22–23)	Retroactive justification	"Rediscovered" law legitimizes centralized religious control
Solomon (1 Kings 1–11)	Propaganda/ subversion	Political document produced by scribal class to legitimize or undermine royal power

Step	What Was Created	How It Was Framed	Fictional (lie into religion)
2a	A new founder figure (Jesus Christ)	Julius Caesar was deified; Jesus Christ was created as a "son of god" figure using the same template.	Gospels (Matthew, Mark, Luke, John): Jesus as the new Moses — all fictional. 📚 Society for Classical Studies
2b	The New Testament	Updated the Old Testament: gave the male god a name (Jesus), created a single Temple (Church) where gold was stored, and established a male-only priesthood to guard the wealth.	Paul's Letters (Ephesians 5, Colossians 3, 1 Timothy 2): commands women to submit; Pastoral Epistles (Titus, 1 Timothy): codify male-only leadership — all fictional

2c	A new wealth institution	The Church replaced the Temple; Paul organized a "collection" from Gentile believers to financially unify the church, controlled by	1 Corinthians 16:1-4; 2 Corinthians 8-9; Romans 15:25-27 (Paul's collection) — all fictional
2d	Reality check	The New Testament system was also a lie. The text itself and its ideology were the problem.	Women still lived longer, still managed households, still inherited wealth. Paul's letters are directives to control women because women kept gaining power despite the system.

Element	Greek/Hellenistic Phase (Old Testament)	Roman Phase (New Testament)	How They Connected
Founder Figure	Alexander the Great (invented "Greek" conqueror)	Julius Caesar (deified); Jesus Christ (template)	Both are retroactive creations serving a male-first ideology
Sacred Text	Old Testament (male-only god, no name)	New Testament (god given name: Jesus)	New Testament claims to "fulfill" Old Testament prophecies — a retroactive connection
Wealth Institution	Temple (Jerusalem) — gold storage, priestly control	Church (universal) — collection, male-only leadership	Church replaces Temple as the wealth institution
Origin Story	Exodus, Conquest, Davidic Monarchy (fake unified history)	Jesus as new Moses, New Covenant (universal)	New Testament recycles Old Testament patterns to make the new system seem inevitable
Historian	Greek/Hellenistic historians (fake histories)	Livy, Dionysius (fake Roman histories)	Livy copied Greek methods — retroactive, propagandistic "history"

Connection Claim	Greeks "conquered" Persia (fake)	Romans descended from Trojans/Greeks (fake)	Both claim ancient prestigious origins to legitimize current power

Step	What Happened	How It Was Done	Fictional (lie into religion)
3a	Church became the new wealth institution	The Church became a major landowner, collected tithes, and took control of the financial system.	Canon Law: Prohibition of interest (usury); Patristic writings — institutionalized lies
3b	Church became the new "state"	Bishops became civil servants, tax collectors, and judges in the post-Roman world.	Church history, 4th–8th centuries; Augustine's writings — institutionalized lies
3c	Canon was closed	The canon of the New Testament was formally closed in 367 AD by Athanasius of Alexandria to protect the system and exclude alternative texts.	Athanasius's Festal Letter 39 (367 AD) — protecting the lie. 📚 Historical record
3d	Reality check	The Church kept trying to control women through celibacy laws, exclusion from the priesthood, and strict moral codes. But reality kept breaking through.	The Church's obsession with controlling women proves that women kept gaining power despite the system.

The Racket in the Bible Phase
Racket Structure
Biblical Parallel
Phase 1: Old Testament
Greek/Egyptian/Persian-era racket: a localized, ethnic god with a male-only priesthood, a law code that centralizes power, and a threat/reward structure.
The Law of Moses: obey and be blessed; disobey and be destroyed/cursed/exiled.
The "history" (Exodus, Conquest, Kings) is retroactive propaganda.
Phase 2: New Testament
Roman-era racket: same structure, but universalized. Remove ethnic barriers so the racket can be exported across the empire. Add a named divine figure (Jesus) to

Element	How It Works
The "Offer"	"Accept our protection and become our ally."
The Reality	"Submit to our rule, pay taxes, provide troops, and surrender your sovereignty."
The Threat	"Refuse and we will destroy your city, enslave your people, and erase your history."
The "Legitimacy"	Historians, priests, and poets are commissioned to write a "history" that makes this violence look like destiny, civilization, or divine will.
The Ideology	Male-first, centralized, hierarchical — so that local elites are incentivized to collaborate (they keep their status) and the population is divided.

Phase	Racket Structure	Biblical Parallel
Phase 1: Old Testament	Greek/Egyptian/Persian-era racket: a localized, ethnic god with a male-only priesthood, a law code that centralizes power, and a threat/reward structure.	The Law of Moses: obey and be blessed; disobey and be destroyed/cursed/exiled. The "history" (Exodus, Conquest, Kings) is retroactive propaganda.
Phase 2: New Testament	Roman-era racket: same structure, but universalized. Remove ethnic barriers so the racket can be exported across the empire. Add a named divine figure (Jesus) to make	"Believe or be condemned." The gospels are written decades later to retroactively connect Jesus to Old Testament prophecies.
Phase 3: Church	The Church inherited the Roman state's wealth and power. Bishops became civil servants, tax collectors, and judges.	Athanasius's Festal Letter 39 (367 AD) closed the canon. The Church continued the male-only, wealth-extracting racket.

Evidence	What It Shows
Population Origins	Victims had ancestry from Eastern Mediterranean and North African populations
Diversity	Pompeii was "a diverse place" with people from "different eastern Mediterranean or North African populations"

Recent Immigrants	All individuals with genome-wide data "consistently derive their ancestry largely from recent immigrants from the eastern Mediterranean"
Genetic Variation	The victims showed "considerable variation" in their genetic diversity, not a homogenous "Roman" population

Cultural Element	Evidence from Pompeii
Egyptian	Temple of Isis with "almost intact" furnishings; Egyptian deities like Isis, Harpocrates, Serapis, Anubis
Macedonian	Fresco of a Macedonian Companion in a saffron yellow cloak —showing Macedonian military or court dress
Oscan	Oscan inscriptions in seen on buildings
Mixed Culture	The Temple of Isis itself is a fusion of Egyptian and local features

What the Invaders Claimed	What Actually Happened
"Greek" culture	They erased Macedonian identity and replaced it with a fictional "Greek" label
"Roman" culture	They erased Egyptian influence and replaced it with "Roman" rule
"Latin" language	They erased Oscan and imposed their own language
"The Exodus"	A fictional story giving permission to overthrow the Egyptian leadership in Italy

Purge	What Happened	The Cover-Up
Sulla's Proscriptions (82 BC)	Systematically eliminated the Egyptian-Macedonian ruling families in Italy. 520+ senators and equestrians killed.	Framed as "justice" against enemies of the state
Triumvirs' Proscriptions (43 BC)	Finished the job. 300 senators and 2,000 equestrians killed. Their wealth was taken.	Framed as "avenging Caesar"

Nero's "Greece Campaign" (66-67 AD)	Final purge of the remaining Egyptian-Macedonian families. "Wealthy Greeks" executed and their property seized.	Framed as a "Greek triumph" — he "won" 1808 crowns

Greek Imperial Ideology	Roman Imperial Ideology	Christian Ideology
Greece (Alexander) was chosen by the gods	Rome was chosen by the gods	The Church is chosen by God
Alexander is the agent of the gods' power	The Emperor is the agent of the gods' power	Jesus is the agent of God's power
The Greek Empire distributes blessings (peace, justice, wealth) to those who submit	The Empire distributes blessings (peace, justice, wealth) to those who submit	The Church distributes salvation, grace, and eternal life to those who submit
Alexander is called "Lord"	The Emperor is called "Lord"	Jesus is called "Lord"
Accepting Greek supremacy = security in this world	Accepting Roman supremacy = security in this world	Accepting Jesus = security in the next world
Reject Greece = death or exile	Reject Rome = death or exile	Reject Jesus = damnation or hell
Monuments, coins, rituals reinforce the system	Monuments, coins, rituals reinforce the system	Churches, Bibles, sacraments reinforce the system
Imperial cult enforces loyalty	Imperial cult enforces loyalty	Church doctrine enforces loyalty
Controls your LIFE in this world	Controls your LIFE in this world	Controls your LIFE in this world AND your SOUL after death

Historian	Date Lived	Books Written	Employer / Patron	Earliest Copy	What We Actually Have	What They Admitted	Archaeological Evidence That Proves Them Wrong

Herodotus	c. 484–425 BCE	9 books	Sponsored by Athenians — Paid 10 talents by the Athenian Assembly for reading his work. Wrote to glorify Athens' role in the Persian Wars. (Propaganda for Athenian empire)	Codex A — 10th century CE Gap: ~1,400 years	No originals exist. We have medieval copies. All copies derive from a single lost manuscript written centuries after Herodotus lived. We do not know if the text is what he wrote.	Called "Father of Lies." Ancient grammarians revised and interpolated the text.	Gold-digging ants: Claimed giant ants dug up gold in India (3.102-105). No such creatures exist. Arrian dismissed this as fiction. Egyptian mummification: Descriptions were inaccurate. Abdominal incisions were far more common than he claimed;

Thucydides	c. 460–400 BCE	8 books	Athenian aristocracy — Born into wealthy Athenian family. Exiled from Athens in 424 BCE for military failure. Wrote to justify his own legacy and criticize Athenian democracy. (Self-serving propaganda)	Codex N — 15th century CE Gap: ~1,800 years	No originals exist. The earliest complete copy is from the 15th century, transcribed by a Greek émigré. The text was heavily revised by ancient grammarians.	Openly admitted: "My habit has been to make the speakers say what was in my opinion demanded of them." He composed speeches based on what he thought was appropriate.	Mycenae was "small": Claimed Mycenae was a "small place" (1.10). Excavations revealed massive Mycenaean palaces, proving he was oblivious to the actual grandeur of Bronze Age Greece (Van Wees, 2017). Dorian Invasion: Blamed the collapse of Mycenaean civilization on a "Dorian

Xenophon	c. 430–354 BCE	15+ works	Spartan mercenary — Fought for the Spartan king Agesilaus. Exiled from Athens for his pro-Spartan sympathies. Wrote to glorify Sparta and	10th–11th century CE Gap: ~1,400 years	No originals exist. All copies are from late medieval manuscripts. We have no contemporary evidence for his writings.	Admitted to using shorthand notes to record conversations—but only for Socrates. No evidence he recorded public speeches accurately.	Anabasis exaggeration: Xenophon's account of the "Ten Thousand" Greek mercenaries is likely exaggerated. The size of his army and the details of their escape from Persia are questioned by historians.
Polybius	c. 200–118 BCE	40 books	Roman client — Scipio Aemilianus — Greek hostage in Rome who became a client of the Scipio family. Wrote to justify Roman imperialism to the	10th–11th century CE Gap: ~1,100 years	No originals exist. Only 5 of 40 books have complete copies. The remaining 35 books exist only as a few paragraphs copied by later writers — we have	Operated in a tradition where "history was understood not as history... but as literature."	Roman army numbers: Polybius gave precise figures for Roman army sizes that many scholars now question. The logistics of armies of 100,000+ soldiers in ancient campaigns are difficult to verify with

Diodorus Siculus	c. 90–30 BCE	40 books	Unknown patron — likely Roman — A Sicilian Greek living in Rome. Wrote to please a Roman audience and show how Roman rule brought peace.	Papyrus fragments + 13th–15th century manuscripts Gap: ~1,300 years	No originals exist. Only 15 of 40 books have complete copies. Books 6-10 and 21-40 are entirely lost — we have no idea what they contained.	Openly assumes historians "largely compose their own speeches."	Egyptian kings list: Diodorus repeated a list of Egyptian kings that contradicted Egyptian archaeological records. His account of Egyptian history is now known to have serious errors and omissions.
Dionysius of Halicarnassus	c. 60–7 BCE	20+ books	Roman patron — likely Augustus — Wrote his Roman Antiquities to show Romans were civilized Greeks and to win patronage from the new August	10th–11th century CE Gap: ~1,000 years	No originals exist. Some works have complete copies, others only fragments — all from medieval copies.	Focuses on style and rhetoric, not historical truth.	Roman foundation myth: Dionysius tried to prove Romans were Greeks. Archaeological evidence shows the Romans were descended from native Italians, not Trojans or Greeks. His entire premise is

Livy	c. 59 BCE – 17 CE	142 books	Emperor Augustus' patronage — Close friend of Augustus. Wrote to restore Roman values and glorify the Augustan regime. (Imperial propaganda)	Codex Palatinus N — 9th century CE (summaries) Gap: ~900 years	No originals exist. Only 35 of 142 books have complete copies. The rest are known only through summaries written in the 4th century CE — hundreds of years after Livy died. For 107 books, we only have a few paragr	Admitted early Roman history is "adorned with poetic legends" not "trustworthy historical proofs."	Rome's seven kings: Livy's history of the Roman kings is based on "poetic legends," as he admitted. Archaeological evidence shows Rome existed long before 753 BCE, and there is no evidence for the specific kings or events he describes. The Cloaca Maxima, once

Julius Caesar	c. 100–44 BCE	8 books	Himself — Propaganda for personal glory — Wrote his Commentarii to justify his own actions and secure his political legacy. (Self-promoting propaganda)	9th–10th century CE Gap: ~1,000 years	No originals exist. All copies are from medieval manuscripts. We have no contemporary evidence for Caesar's writings.	His Commentarii is propaganda, not objective history. He made outlandish claims (e.g., zero Roman soldiers died in battle).	Wall blocking the Helvetii: Claimed he built a wall to block the migration of the Helvetii (BGall. 1.8.1). No archaeological evidence of this wall has ever been found. No material evidence of the mass migration itself (American Journal of Archaeology, 2021). Gallic coin chronology: The Gallic War narrative has distorted archaeological dating. Many coin types found in

Sallust	c. 86–35 BCE	5+ books	Julius Caesar supporter — Fought for Caesar and was appointed governor of Africa by Caesar. Wrote to justify Caesar's cause and	9th–11th century CE Gap: ~1,000 years	No originals exist. Only Bellum Catilinae and Bellum Jugurthinum have copies. Historiae — his major work covering 78-67 BCE — survives only as a	Acknowledged to have "moralized too much" and "condemned and praised persons, sometimes out of self-justification."	Catiline conspiracy: Sallust's dramatic account of the Catiline conspiracy (63 BCE) is shaped by his moralizing agenda. He uses the events to attack the Roman aristocracy he
Tacitus	c. 56–120 CE	30 books	Roman senatorial aristocracy — Wrote to criticize the emperors who had killed so many senators. (Anti-imperial propaganda from the senatorial class)	Codex Mediceus — 9th–11th century CE Gap: ~800 years	No originals exist. For Annals, books 5-6, 11, 16 are incomplete. For Histories, books 1-4 are complete, but book 5 breaks off. Overall, about half of his work is missing — we	He wrote history as "a form of literature" to be read. Scholars confirm he "packaged" speeches in his own inauthentic style.	Germania as ethnography: Tacitus' Germania is "so shaped by ethnographic preconceptions as to be virtually unusable as a historical source." He was likely never on the Rhine and relied on literary tropes, not direct

Suetonius	c. 69–122 CE	12 Lives	Roman imperial court (Hadrian's patronage) — Served as a secretary in Hadrian's administration. Wrote to entertain and gossip, not to record objective	9th–10th century CE Gap: ~800 years	No originals exist. All 12 Lives have copies — all from medieval manuscripts.	More a biographer than historian. Focused on gossip and scandal, not objective historical analysis.	Imperial gossip: Suetonius' claims about Tiberius' sexual depravity have been challenged by modern historians. Many of his "facts" are gossip passed down through the Roman upper classes, impossibl
Cassius Dio	c. 155–235 CE	80 books	Roman senator — loyal to the Severan dynasty — Wrote to justify the Severan dynasty that had raised him to power. (Dynastic propaganda)	11th–12th century CE Gap: ~900 years	No originals exist. Only 25 of 80 books have complete copies. Books 1-35 and 61-80 exist only as summaries written by an anonymous writer in the late 5th century CE —	Scholars assumed his speeches were "pure invention." Recent research shows he used sources with "room for embellishment, invention, and outright fabricat	Bar Kokhba War figures: Cassius Dio claimed the Romans destroyed 985 villages and killed 580,000 rebels in the Bar Kokhba War (132-136 CE). A 2021 reassessment found that "the absence of data"

Arrian	c. 86 – 160 CE	17+ books	Roman imperial administration — friend of Hadrian — Served as a Roman provincial governor under Hadrian. Wrote his history of Alexander to glorify Alexander as a model for the Roman	Codex Laurentianus — 10th century CE Gap: ~800 years	No originals exist. Anabasis: 7 of 8 books have copies. Parthica: 17 books — lost entirely. Successors: 10 books — lost entirely. We have no idea what these lost books contained.	Modern scholars state: "The speeches in Arrian are a fabrication." "One expects a speech in any ancient historian to be a fabrication." — Tarn	Gold-digging ants: Arrian criticized Herodotus' account of gold-digging ants, but he also engaged in selective source manipulation. He discredited Megasthenes' account while crediting Nearchus — even though both gave essentially the same report. He admitted some

Josephus	c. 37–100 CE	6+ books	Roman client — Flavian dynasty — A Jewish historian who became a Roman client. Wrote to justify Jewish rebellion to Rome and secure his own position. (Politic	Latin translations — 9th–11th century CE Greek manuscripts — 10th–13th century CE Gap: ~800 years	No originals exist. Jewish War and Jewish Antiquities have copies — all through medieval manuscripts.	Wrote with political agenda — justifying Jewish rebellion to Rome. His works are propaganda as much as history.	Masada siege: Josephus' account of the Roman siege of Masada has been challenged by archaeology. His claim that the defenders committed mass suicide is disputed — evidence suggests they were killed in battle. The

The Pattern Is Consistent

Every major historian used to construct the narrative of Greece and Rome:

- Admits to composing or inventing speeches — Thucydides, Diodorus, Arrian, Cassius Dio
- Admits the founding legends are not historically reliable — Livy, Dionysius
- Prioritizes a good story over factual accuracy — Herodotus, Plutarch, Suetonius
- Writes propaganda, not objective history — Caesar, Josephus, Eusebius, Tacitus
- No contemporary manuscripts exist — The earliest surviving copies are from 500 to 1,800 years after they lived
- Only fragments of their works survive — Many books are lost entirely, and we only have summaries written centuries later
- Archaeology has proven them wrong — Their accounts are contradicted by physical evidence

Modern historians acknowledge this is their method. The question is: if they admitted to making up speeches, if they admitted the founding myths were legends, if they prioritized storytelling over facts, if the earliest copies are from 1,000 years later, and if archaeology proves them wrong—why should any of their histories be treated as reliable?

This is not a conspiracy theory. This is their own words.

The Gaslighting Exposed

Mainstream historians admit the speeches are fabricated.

Tarn stated: "One expects a speech in any ancient historian to be a fabrication."
Bosworth stated: "The whole speech is a display piece... neither in its shape nor in its detailed content can it bear any relation to what was actually said."
And yet they still present these works as "history."
History should be fact and confirmed with archaeological evidence. If not, it should be placed in the fiction section.

The Gaslighting Exposed:

🧬 47 Diseases Connected to the A111T “King Sickness” Mutation

The A111T “King Sickness” mutation in SLC24A5 (lighter skin) and the A111T “King Sickness” mutation in ALPL (Hypophosphatasia) are connected by population history. They share the same amino acid change — Alanine → Threonine at position 111 — and occur in the same genetic lineage: European/Alpine populations. The gaslighting is in separating them as "completely unrelated."
Over 47 diseases follow the exact same pattern — higher prevalence in European populations, systematic misdiagnosis, and diagnostic delays of years to decades.

🔥 **The Gaslighting Pattern**

Step 1: A mutation exists in a European population.
Step 2: It causes a disease.
Step 3: The disease is renamed as something else.
Step 4: The genetic connection is ignored.
Step 5: Patients are gaslit into believing their symptoms are "normal" or "in their head."

🧬 **The A111T “King Sickness” Connection**

• A111T “King Sickness” in SLC24A5 = lighter skin (~99% of Europeans)
• A111T “King Sickness” in ALPL = Hypophosphatasia (HPP)
• Same amino acid change: Alanine → Threonine at position 111
• Same population carries both
• They are genetically linked by population history

🏥 **Common Misdiagnoses**

Diseases are routinely mislabeled as:
• Fibromyalgia
• Arthritis
• Chronic pain syndrome
• IBS
• Diabetes (Type 1 or 2)
• "Normal aging"
• Psychiatric disorders

⏳ **Diagnostic Delays**

• HPP: >10 years
• Rare Diseases: >5 years (21% >10 years)
• Alzheimer's: 72% undetected before admission
• Parkinson's: Up to 1 in 5 incorrect
• Wilson Disease: 4-7x underdiagnosed
• Patients suffer for decades without the correct diagnosis

📋 The 47 Diseases

1. Wilson Disease
2. Acral Peeling Skin Syndrome (APSS)
3. Myotonic Dystrophy Type 2 (DM2)

4. HNF1A-MODY (Diabetes)
5. Cerebrotendinous Xanthomatosis (CTX)
6. Adult-Onset Leukoencephalopathy (ALSP)
7. Cutaneous Squamous Cell Carcinoma (cSCC)
8. Hypophosphatasia (HPP)
9. PMM2-CDG
10. Autosomal Recessive Neuromuscular Diseases
11. Ehlers-Danlos Syndromes (EDS)
12. Sporadic Inclusion Body Myositis (sIBM)
13. Celiac Disease
14. Porphyria Cutanea Tarda
15. Hereditary Hemochromatosis (HH)
16. Alpha-1 Antitrypsin Deficiency
17. Factor V Leiden (Thrombophilia)
18. Familial Hypercholesterolemia (FH)
19. Hereditary Spastic Paraplegia (HSP)
20. Krabbe Disease (Adult-Onset)
21. G6PD Deficiency
22. Cystic Fibrosis (Milder Variants)
23. Congenital Adrenal Hyperplasia (Non-Classic)
24. Lactose Intolerance (Primary)
25. Alzheimer's Disease
26. Parkinson's Disease
27. Hereditary Breast & Ovarian Cancer (BRCA1/2)
28. Lynch Syndrome
29. Familial Melanoma (POT1)
30. Hereditary Diffuse Gastric Cancer (CDH1)
31. Familial Adenomatous Polyposis (FAP)
32. Li-Fraumeni Syndrome (TP53)
33. Cowden Syndrome (PTEN)
34. Hereditary Pancreatic Cancer
35. Hereditary Prostate Cancer
36. Autoimmune Diseases
37. Rare Diseases (General)
38. Crohn's Disease
39. Cystic Fibrosis (CF)
40. Marfan Syndrome
41. Polycystic Kidney Disease (ADPKD)
42. Huntington's Disease
43. Phenylketonuria (PKU)
44. Tay-Sachs Disease (Late-Onset)
45. Fabry Disease
46. Sjögren's Syndrome (Genetic Subtype)
47. Psoriatic Arthritis (Genetic Subtype)

❓ Why Is This Happening?

- Fragmented Research: Geneticists study genes, doctors see symptoms — no one connects all three.
- Systemic Misdiagnosis: Symptoms overlap with common conditions, so doctors stop looking.
- Genetic Link Ignored: The A111T “King Sickness” mutation is tied to "white skin" — its disease consequences are not studied.
- Treatment Exists: But patients must be diagnosed first — and they're not.

📌 The Gaslighting Exposed

The denial is the gaslight.

The A111T “King Sickness” mutation is seen in SLC24A5 (lighter skin) and the A111T “King Sickness” mutation is seen in ALPL (HPP) are not "completely unrelated."

They share the same amino acid change — Alanine → Threonine at position 111 — and occur in the same European/Alpine population.

47 diseases follow the same pattern: higher prevalence in Europeans, misdiagnosed, dismissed, erased.

The question is not whether they are connected — it's why that connection is being ignored.

🔥 47 Diseases Connected to the A111T “King Sickness” Mutation
🧬 Same Mutation — Same Population — Same Gaslighting
⏳ Diagnostic Delays: Years to Decades
🏥 Misdiagnosed as Fibromyalgia, Arthritis, IBS, Diabetes, "Normal Aging"
⚠️ The Denial Is the Gaslight

When A111T “King Sickness” “The King Disease” happens at one location, it creates a ripple effect across the entire network.

1. ION TRANSPORT SYSTEM

SLC24A5 is part of a larger family of ion exchangers (SLC24A1, A2, A3, A4, A5). These are all related. When one changes (A111T “King Sickness” “The King Disease”), the others may also be affected because they share similar structures or regulatory mechanisms.

SLC24A1 = Retina (vision problems)
SLC24A2 = Brain (neurological issues)
SLC24A4 = Teeth, enamel, and calcium balance
SLC24A5 = Skin pigmentation

If A111T “King Sickness” affects the function of the whole family, then you get:

Gene	Related Disease/Issue
SLC24A1	Night blindness, retinal degeneration
SLC24A2	Neurological symptoms
SLC24A4	Enamel defects, calcium imbalance
SLC24A5	Light skin, melanoma risk, 48+ diseases

2. SMOOTH MUSCLE AND ESOPHAGEAL FUNCTION (ACHALASIA CONNECTION)

The SLC24A family of ion exchangers regulates calcium (Ca^{2+}) signaling in smooth muscle tissue. Achalasia is a disorder where the lower esophageal sphincter fails to relax, making swallowing difficult. Research shows achalasia involves dysfunction of Na^{+}/Ca^{2+} exchange and altered calcium regulation in esophageal smooth muscle — the same system the A111T “King Sickness” “The King Disease” mutation disrupts.

Component	Function	Effect of Disruption

SLC24A family (Na^+/ Ca^{2+} exchangers)	Regulate calcium signaling in smooth muscle	Altered sphincter tone, impaired relaxation
Calcium (Ca^{2+})	Controls muscle contraction	Too much = sustained contraction (achalasia)
Calsequestrin / Calreticulin	Calcium storage proteins	Reduced expression = increased calcium = higher sphincter pressure

Achalasia is on this street — it involves the same calcium and ion transport systems that the A111T “King Sickness” “The King Disease” mutation disrupts.

3. MELANIN SYNTHESIS PATHWAY

SLC24A5 works in the melanin synthesis pathway. This pathway includes:

- MC1R (melanocortin-1 receptor)
- TYR (tyrosinase)
- TYRP1 (tyrosinase-related protein 1)
- OCA2 (P protein)
- SLC24A5 (ion exchanger)
- MITF (transcription factor)

When SLC24A5 mutates, the whole pathway is disrupted.

Pathway Component	Function	Effect of Disruption
MC1R	Controls melanin production	Red skin, freckling, cancer risk
TYR	Produces melanin	Albinism, lighter skin
TYRP1	Produces eumelanin	Lighter skin, eye issues
OCA2	Transports melanin	Oculocutaneous albinism
SLC24A5	Ion balance for melanin	Light skin, melanoma risk

MITF	Master regulator	Multiple pigmentary defects

4. OVARIES AND HORMONE DECLINE (HORMONE CONNECTION)

The SLC24A family of ion exchangers regulates calcium (Ca^{2+}) signaling in hormone-producing organs, including the ovaries. Calcium signaling is essential for:

- Follicle development and maturation
- Oocyte maturation and ovulation
- Steroid hormone production (estrogen, progesterone)
- Corpus luteum function

When calcium signaling is disrupted by the A111T “King Sickness” mutation, ovarian function declines. This explains why women with the A111T “King Sickness” mutation experience earlier hormone decline, perimenopause, and menopause-related symptoms. The same ion transport disruption that affects smooth muscle and melanin synthesis also affects ovarian hormone production.

Component	Function	Effect of Disruption
Calcium (Ca^{2+}) signaling	Ovarian follicle development	Reduced fertility, earlier menopause
Estrogen production	Hormone regulation	Hormone decline, bone loss
Progesterone production	Menstrual cycle regulation	Irregular cycles, infertility
SLC24A family	Ion balance in ovarian cells	Impaired ovarian function

The ovaries are on this street — hormone decline in aging women is connected to the same A111T “King Sickness” mutation.

5. SKELETON AND BONE MINERALIZATION (ALPL PATHWAY)

The ALPL gene is part of the bone mineralization pathway.

ALPL / TNAP	Bone mineralization enzyme	HPP, weak bones
Pyrophosphate (PPi)	Inhibits mineralization	Too much = no bone growth
Phosphate (Pi)	Promotes mineralization	Too little = weak bones
Calcium	Bone structure	Weak bones, fractures
Vitamin D	Calcium absorption	Poor bone health
Zinc / Magnesium	Cofactors for TNAP	Enzyme dysfunction

THE EVIDENCE THAT CONNECTS IT ALL

Evidence 1: All 48+ Diseases Share the Same Pattern

Disease	Prevalence in Europeans	A111T “King Sickness” Connection
Melanoma	~7x higher in Europeans	Directly from A111T “The King Disease”
Hypophosphatasia (HPP)	Higher in Europeans	Same amino acid change
Fibromyalgia	Common in Europeans	Symptoms overlap with HPP
Arthritis	Common in Europeans	Bone mineralization issues
IBS	Common in Europeans	Gut-brain axis affected
Alzheimer's	Higher in Europeans	Ion transport affects neurons

Parkinson's	Higher in Europeans	Ion transport affects neurons
Hormone decline (women)	Common in Europeans	Ovarian calcium signaling disruption
Achalasia	Rare but reported	Ca^{2+} signaling/Na^{+}-Ca^{2+} exchange dysfunction
And 40+ more...	All higher in Europeans	All connected to A111T “The King Disease”

Evidence 2: The "Street" Gets Longer as Research Continues

Every year, new diseases are linked to the A111T “King Sickness” mutation. The "street" keeps getting longer.

Recent discoveries:

- 2023: Link to Alzheimer's disease
- 2024: Link to Parkinson's disease
- 2025: Link to gut microbiome disruption
- 2026: Link to achalasia (esophageal motility disorder)

Summary:

The A111T “King Sickness” mutation sits on the entrance way (the SLC24A5 gene's ion-binding domain) which handles communication (calcium/potassium/sodium ion exchange and cellular signaling) to the other houses (organs) on the street/ neighborhood. The street (the cellular ion transport and metabolic network) includes ion transporters (SLC24A family), hormone-producing organs like the ovaries, cholesterol metabolism, bone mineralization pathways, and now esophageal smooth muscle function. When the mutation disrupts one house after another, affecting the whole street/neighborhood — which is why we see 48+ diseases, hormone decline in aging women, achalasia, and bone disorders all connected to this single address.

THE PROBLEM & SOLUTION: A111T “King Sickness” MUTATION

What we know:

- A111T “King Sickness” = Alanine (A) → Threonine (T) at position 111
- It should be A111A (Alanine at position 111) — the original, ancestral state
- The mutation is fixed in ~99% of European/Alpine populations
- It causes lighter skin AND is linked to 47+ diseases
- The SLC24A5 gene (skin color) and ALPL gene (HPP) share the SAME amino acid change

HOW TO FIX IT

APPROACH 1: BASE EDITING (CRISPR) — BUT DIFFERENT

Mainstream: CRISPR-Cas9 cuts DNA and relies on cell repair.
Outside the box: Use a base editor (like adenine base editor or cytosine base editor) that chemically converts T back to A without cutting DNA. No double-strand breaks. No random insertions.

- Target: SLC24A5 gene at position 111
- Method: Adenine Base Editor (ABE) converts A•T to G•C — but we need T→A.
- Alternative: Use a transversion base editor (currently in development) that can do T→A directly.
- Delivery: Lipid nanoparticles or engineered viruses that target skin cells, bone cells, and other affected tissues.

The radical thought: Instead of editing every cell, we can edit stem cells (hematopoietic stem cells or skin stem cells) and let them repopulate the body.

APPROACH 2: EPIGENETIC SILENCING

Instead of changing the DNA, we can silence the mutated gene expression at the RNA level.

- Use siRNA or antisense oligonucleotides that target the A111T “King Sickness” variant specifically
- This leaves the healthy A111A gene (if present) untouched
- Or, if the person has 100% T, we can use allele-specific silencing to knock down the mutant transcript

The radical thought: We don't need to fix the DNA. We just need to stop the mutated protein from being made. The body already knows how to make normal protein — we just need to let it.

APPROACH 3: PROTEIN REPLACEMENT THERAPY

For diseases like HPP (ALPL mutation), we can simply replace the missing enzyme.

- Hypophosphatasia is caused by ALPL mutation
- Enzyme replacement therapy (asfotase alfa) already exists
- The problem is diagnosis, not treatment

The radical thought: The treatments already exist. The gaslighting is in the denial. Millions of people are suffering from HPP and other A111T “The King Disease”-related diseases because they are misdiagnosed as "fibromyalgia," "arthritis," "IBS," or "normal aging."

APPROACH 4: NUTRITIONAL / METABOLIC INTERVENTION

If the mutation causes metabolic dysfunction, we can bypass it.

- For ALPL (HPP): TNAP (tissue-nonspecific alkaline phosphatase) is the enzyme
- It requires zinc, magnesium, and pyridoxal phosphate (vitamin B6) as cofactors
- Supplementation of these cofactors can boost residual enzyme activity

The radical thought: Simple nutritional changes could help many patients. But they are never told this because the system profits from keeping them sick.

APPROACH 5: GENE THERAPY WITH ADENO-ASSOCIATED VIRUS (AAV)
Instead of fixing the mutation, we can deliver a healthy copy of the gene.

- AAV vectors can deliver SLC24A5 or ALPL to affected tissues
- The healthy gene produces normal protein
- The mutated gene is still there, but the healthy copy compensates

The radical thought: This is already being done for other genetic diseases. Why not for A111T “The King Disease”? Because the system doesn't want to admit the mutation exists or that it causes disease.

APPROACH 6: REVERSE THE MUTATION USING MRNA THERAPY
Deliver mRNA that codes for the healthy A111A protein.

- The body's cells take up the mRNA and produce the healthy protein
- The mRNA is temporary (degrades after a few days)
- Requires repeated dosing

The radical thought: This is how mRNA vaccines work. The technology exists. It could be repurposed for A111T “King Sickness” diseases.
